- In order to address concerns raised by the Ministry of Environment and Energy, the proponent shall carry out the following prior to the commencement of the construction and the completion of the detailed construction design of each stage:

#### *Air Quality*

- Prior to the commencement of construction of the surface facilities of each station of the undertaking, the proponent shall prepare, and submit to the satisfaction of the Director, MOEE Central Region, an air quality study for the construction and operation of the station. This study shall evaluate, but not be limited to, the nitrogen oxides (NOx), carbon monoxide (CO), suspended particulate matter (SPM) and odour levels around each of the proposed stations.

#### *Soils Management, Decommissioning and Stormwater Management*

- Prior to commencement of construction under each construction contract of this undertaking, the proponent shall prepare and submit a material and soil management strategy for the excavation and movement of any contaminated material for each phase of the proposed construction. The proponent shall show the exact location of closed landfill sites (other than Site 3052) which will be affected by the construction, and where applicable, consider the implications of these sites in the strategy. The strategy will employ a phased approach and shall include focused intrusive investigations and remedial design and implementation, including comprehensive geotechnical and hydrogeological investigation, where applicable. The results of each investigation of the materials and soil management strategy for the phase should be incorporated in a report. This report shall be submitted to the satisfaction of the Director, MOEE Central Region.
- Prior to the commencement of construction under each construction contract of this undertaking, the proponent shall obtain any permits under section 20 (3) of the *Ontario Water Resources Act* which will be required. The application for any permit shall be accompanied, if applicable, by a letter from the

relevant municipality acknowledging its permission to permit the discharge of the dewatering effluent into the sanitary or storm sewer.

- d) Prior to commencement of construction on any contract for which dewatering will be required the proponent shall prepare a report predicting the volumes of water which will be produced and setting out the methods of treating and disposing of such water. The report shall describe any mitigative measures proposed including those to protect any surface water to which the water will be discharged. The report shall be submitted to the Director MOEE Central Region. Construction on the contract shall not commence until the Director has advised the proponent in writing that the Director is satisfied with the report and its proposals and the proponent has obtained any approvals or permits under the OWRA for the proposals. Except as agreed in writing by the Director, the proponent shall carry out dewatering activities in accordance with the report.

#### *Noise and Vibration*

- e) Prior to construction of a station of the undertaking, the proponent shall provide to the Director, MOEE Approvals Branch, a new and detailed noise impact assessment, and receive written notice from the Branch that the noise impact assessment is satisfactory. This condition shall not preclude the proponent from demolishing buildings, levelling the site and initiating utility relocation and servicing.
- f) In applying Part B of the MOEE/TTC Noise and Vibration Protocol, dated June 17, 1993, the proponent shall identify preferred locations for the special trackwork, if possible, sited in undeveloped or industrial areas and away from sensitive receptors described in Part B of the Protocol. Special trackwork shall be sited in a preferred location, unless for reasons not related to the control of noise and vibration, an item of special trackwork should be located elsewhere.
- g) The TTC shall use continuous welded track, and for all underground alignments, a double-tie trackbed system.

#### *General Note*

It should be noted that where a subcondition of Condition 7 requires a report to be submitted to the satisfaction of a Director, in order to satisfy the condition, the Director must have filed in the Public Record a notice in writing to the proponent indicating that the Director is satisfied that the proponent has adequately addressed the matter. In determining whether the matter has been adequately addressed, the Director shall consider whether or not potential adverse effects have been avoided or sufficiently minimized. The proponent's responsibility to carry out this undertaking in an environmentally sound manner with no adverse impacts on the environment other than those specified is not reduced by the Director giving such notice of satisfaction. The proponent shall carry out the undertaking in accordance with the report, with such amendments as agreed from time to time by the Director.

#### *REASONS*

My reasons for giving approval are:

1. Condition 5 is to ensure that adequate consultation takes place between the proponent and the Metropolitan Toronto Regional Conservation Authority (MTRCA) and the Ministry of Natural Resources (MNR) before the proponent applies for any additional approvals required by laws administered by MTRCA or MNR.
2. On the basis of the proponent's Environmental Assessment and the Review, the proponent's conclusion that, on balance, the advantages of this undertaking outweigh its disadvantages appears to be valid.
3. No other more beneficial alternative method of implementing the undertaking was identified.
4. On the basis of the proponent's Environmental Assessment, the review and the conditions of approval, the construction, operation

and maintenance of the undertaking will be consistent with the purpose of the Act (section 2).

### REPORT TO THE WORKERS' COMPENSATION BOARD ON IDSP REVISIONS TO SCHEDULE 3: PHASE ONE

**November, 1994**

Industrial Disease Standards Panel  
IDSP Report No. 14  
Toronto, Ontario

#### Industrial Disease Standards Panel

In 1985 the Ontario legislature established the Industrial Disease Standards Panel (IDSP) to investigate and identify diseases related to work. The Panel is independent of both the Ministry of Labour and the Workers' Compensation Board. At the end of each fiscal year the WCB reimburses the Ministry for the Panel's expenditures.

The Panel's authority flows from section 95 of the Workers' Compensation Act and its functions are set out as follows:

- 95 (8) (a) to investigate possible industrial diseases;
- (b) to make findings as to whether a probable connection exists between a disease and an industrial process, trade or occupation in Ontario;
- (c) to create, develop and revise criteria for the evaluation of claims respecting industrial diseases; and
- (d) to advise on eligibility rules regarding compensation for claims.

Decisions of the Panel are made by its members who represent labour, management, scientific, medical and community interests. Once the Panel makes a finding, the WCB is required to publish the Panel's report in the Ontario Gazette and solicit comments from interested parties. After considering the submissions the WCB Board of Directors decide if the Panel's recommendations are to be implemented, amended or rejected.

To assist with its work, the Panel has a small staff of researchers, analysts and support people. In addition to its own staff, the Panel relies heavily on the advice of outside experts in science, medicine and law, as well as input from parties of interest.

### REPORT TO THE WCB ON IDSP REVISIONS TO SCHEDULE 3: PHASE ONE

#### The Issue and How it Arose

Approximately two years ago in the course of inter-agency discussions, the Workers' Compensation Board (WCB) made an informal request to the Industrial Disease Standards Panel (IDSP) for a revision of Schedule 3 in Regulation 951 to *The Workers' Compensation Act* (the Act). The request arose from an apparent dissatisfaction with the Schedule's existing form and contents on the part of stakeholders and adjudicators who find the Schedule to be in need of revisions. Furthermore, all parties interested in the revision of Schedule 3 are agreed that the existing form and contents are out of date and that a viable Schedule needs constant updating. The Panel examined the Board's request and agreed to revise the Schedule.

Schedule 3 has been part of Ontario workers' compensation law since its inception in 1914 and included only six diseases. Between 1914 and the present, Schedule 3 has been amended about 14 times. The amendment before last was in 1965, which simply changed the wording of the existing Tuberculosis entry made in 1951. The last amendment was in May 1994, which added nasal and sinus cancer in the nickel industry. In the interim, the WCB has been able to add to the list of compensable diseases by declaration without formal amendment of Reg. 951. This was accomplished by the use of disease guidelines.

The Schedule's original function was to provide an exclusive list of compensable diseases; that is, it gave public notice of which diseases alone were compensable under the Act. The list lost its exclusivity when the definition of industrial disease was made more inclusive in 1984. Schedule 3, however, has not lost its notice function. Diseases listed in Schedule 3 were also given the benefit of an explicit presumption of cause; therefore, a listed disease could be presumed to be caused by a listed work process, unless the contrary were proved.

#### Investigations by the Panel

The IDSP undertook the revision of the current Schedule 3 (Appendix 1) pursuant to its mandate in s.95 of the Act. The project began with an examination of relevant sections of the Act, the legal definition of industrial disease, the presumptive clauses pertaining to Schedule 3, current adjudicative practice and Workers' Compensation Appeal Tribunal (WCAT) decisions concerning occupational disease claims.

After gaining a thorough understanding of the applicable law, the meaning and effect of the presumptive clauses and disease adjudication, the Panel then proceeded to an investigation on the use of disease

schedules or their equivalent in other jurisdictions, with particular focus on Canada.

The Panel also produced a prototype called, *Guides For The Adjudication Of Occupational Diseases*. The prototype was needed to test the feasibility of a disease schedule. Adjudication by reference to a schedule alone is impracticable because decision makers need readily available information on diseases, conditions and work processes to guide them. In addition to the Guides, the Panel commissioned a literature review on occupational exposures and effects relating to a particular chemical (cadmium).

#### Revisions by the Panel

As investigations moved forward, the project of revising Schedule 3 became larger than first anticipated. The IDSP has concluded that revision should proceed in phases.

The compensation of occupational diseases<sup>1</sup> happens by virtue of section 1(1) of the Act, which contains the following:

"industrial disease" includes,

- (a) a disease resulting from exposure to a substance relating to a particular process, a trade or occupation in an industry,
- (b) a disease peculiar to or characteristic of a particular industrial process, trade or occupation,
- (c) a medical condition that in the opinion of the Board requires a worker to be removed either temporarily or permanently from exposure to a substance because the condition may be a precursor to an industrial disease, or
- (d) any of the diseases mentioned in Schedule 3 or 4; ("maladie professionnelle").

In subparagraphs (a) to (c), a disease or medical condition<sup>2</sup> is compensable if it meets the requirements set out in the whole definition.<sup>3</sup> In (d) scheduled diseases are demonstrably industrial diseases because they meet the definition and therefore are either presumed or deemed to be caused by the employment.

The legislative intent in (d) is to expedite the process of adjudication in disease claims. To be compensable, a disease must meet the criteria set out in the Act. A schedule of diseases, therefore, gives public notice that diseases in Column 1 meet the legal criteria and are considered to be characteristic of the work processes specified in Column 2, unless the contrary is proved in a particular case.

Disease compensation is aided by the evidentiary presumptions set out in s.134(9)-(10) of the Act, which state:

- (9) *If the worker at or before the date of the disablement was employed in any process mentioned in the second column of Schedule 3 and the disease contracted is the disease in the first column of the Schedule set out opposite to the description of the process, the disease shall be deemed to have been due to the nature of that employment unless the contrary is proved.*
- (10) *If the worker at or before the date of the disablement was employed in any process mentioned in the second column of Schedule 4 and the disease contracted is the disease in the first column of the Schedule set out opposite to the description of the process, the disease shall be conclusively deemed to have been due to the nature of the employment. 1984, c. 58, s. 34 (1).*

1 The Panel has adopted this term in place of industrial diseases.

2 In this Report, the term, disease, means disease or condition or both.

3 As revealed in the qualifying language of each subparagraph.

If the prerequisites set out by these two subsections are met, then the law directs that claims for scheduled diseases are either presumed compensable until proved otherwise or deemed compensable.<sup>4</sup> Adjudication by schedule proceeds on the basis that a probable connection between disease and work is demonstrable.

Both law and practice concerning occupational disease compensation is more or less uniform in Canada, the sole exception being Saskatchewan.<sup>5</sup> A compensable disease is therefore any disease that can be shown to be work-related or that is already legally recognized as work-related. Schedules legally recognize certain diseases as compensable on an explicit presumption of their origin.

**Phase One.** The revisions to the Schedule identified in Phase One do not deviate from the existing law or propose any substantive changes to existing protection. In this Phase, the Panel will recommend changes to the format of Schedule 3 and editorial changes to the content. This Report therefore ends Phase One of the Schedule 3 project.

**Phase Two** will recommend additions or deletions to the Schedule. For example, diseases specific to a chemical agent listed under Poisoning can be added in the appropriate disease category: benzene induced leukaemia, after the appropriate investigation, could be added under, Cancers. Inclusion of agent specific diseases clarifies the law and enhances adjudication. Specification also strengthens the causal presumption.<sup>6</sup>

Other changes can be made in the following way:

#### a) Progressive Injuries

In Ontario, practice distinguishes between progressive injuries that are disablements and diseases that are progressive injuries. The WCB tracks the following Schedule 3 diseases as accidents (by definition an accident includes disablements):<sup>7</sup>

- Bursitis
- Infected Blisters
- Tenosynovitis
- Ulceration of the Corneal Surface
- Welder's Flash/Retinitis

All five can be called diseases to the extent of their chronic effects in certain circumstances. All five injuries have a common etiology: repeated exposure.

4 Until the law is changed to say otherwise. Another example of statutory direction is s.134(12), which stipulates that notwithstanding other provisions in the Act, compensation for silicosis will not be payable unless work exposure to silica amounts to at least two years before impairment. Section 134(16) does the same for asbestosis. The presumption in s.134(9) is thus rebutted if the evidence shows less than the minimum stipulated exposure.

5 Saskatchewan compensates accidents and occupational diseases case-by-case as injuries; its Act has neither a disease schedule nor a definition of occupational disease. By contrast, Manitoba has no schedule but uses guidelines and includes diseases in the definition of accident, as well as a separate definition of occupational disease.

6 Inclusion could fortify the presumption to the point where there is a peculiar association between agent and disease that calls for inclusion in Schedule 4.

7 1. (1) In this Act, "accident" includes,  
 (a) a wilful and intentional act, not being the act of the worker,  
 (b) a chance event occasioned by a physical or natural cause, and  
 (c) disablement arising out of and in the course of employment; ("accident") R.S.O. 1980, c.539, s.1(1), cl. (a); 1982, c. 61, s. 2.

Should these five be included in the Schedule? Any of the five could be called an accident; however, Canadian practice has long treated these injuries as diseases.<sup>8</sup> They are considered diseases because they manifest themselves over time.

Deleting any of these injuries from the Schedule would amount to a substantive change in the law. Such a change cannot be contemplated without detailed justification and consultation.

#### b) Diseases Recognized by WCB Guidelines

One way to update the Schedule is by inclusion of occupational diseases recognized by the WCB but not included in the schedules. Such diseases are legally compensable and can therefore be presumed occupational in origin. They are regulated by guidelines.<sup>9</sup> The current guidelines identify occupational diseases (listed below) associated with particular exposures, occupations or work sites, as noted in parentheses:

- Lung cancer  
 (arsenic, asbestos, nickel smelting and nickel production, Dofasco foundries,<sup>10</sup> Deloro Smelting and Refining, INCO refineries, gold miners)
- Laryngeal cancer (asbestos, nickel)
- Nasal cancer (nickel production)<sup>11</sup>
- Gastrointestinal cancer (asbestos)
- Poliomyelitis
- Fume [isocyanate] Toxicity
- Rabies
- Noise Induced Hearing Loss
- Tinnitus
- Vibration Induced White Finger Disease
- Chronic Obstructive Lung Disease (smelter workers)
- Emphysema (alpha 1 anti-trypsin deficiency)
- Scleroderma (silica).

The legal effect of guidelines is to identify compensable diseases without formal amendment of Schedule 3. Any disease so recognized can therefore be presumed to have a probable connection to work.

The Panel believes that guideline diseases vary from scheduled diseases only in their strength of association to work. If the probable connection is conclusive, then the disease should be in Schedule 4, and if it is strong, the disease should be in Schedule 3. If the probable connection is moderate, however, the disease should be regulated by guideline.

There is a difference between a probable and possible connection to work. Diseases not regulated by guidelines or by schedules are possibly work-related and therefore adjudicated case-by-case. A possible connection could eventually be recognized as a probable one.

Some of the guideline diseases listed above can be scheduled with less intensive study than needed for new diseases. Apart from the cancers, none of the diseases in the current guidelines appears controversial for occupational origin. Furthermore, a recommendation to schedule one of these diseases would be reinforced if it were already scheduled in other Canadian jurisdictions.

8 British Columbia, Alberta, Quebec, New Brunswick, Nova Scotia and Prince Edward Island have scheduled some or all of these five injuries.

9 Operational Policy Manual. Workers' Compensation Board of Ontario. There are 17 guidelines for unscheduled diseases.

10 Here is a good example of why the guidelines need updating: Dofasco no longer owns the foundries.

11 This disease has been placed on both schedules; however, the guideline also deals with case-by-case adjudication.

12 For example, British legislation retains poisonings by the work process. France has an exclusive schedule with diverse specified processes, symptoms and diseases. The term poisoning is thus narrowed to particular diseases and specified symptoms, such as plumbism.

An examination of Appendix 3, which is an inter-jurisdictional comparison of scheduled diseases, may indicate which Ontario WCB guideline diseases should be considered for scheduling.

#### c) Diseases Scheduled in Other Canadian Jurisdictions

It could be reasonable to use other schedules in Canada as a reference for adding new entries to Schedule 3 because other jurisdictions reflect a common historical experience and similar responses to occupational disease compensation. For diseases not yet listed in Ontario, the fact of being scheduled elsewhere will at least signal the need to schedule, provided that the relevant causative processes are found here.

This Phase will investigate the guideline diseases and the diseases scheduled in other Canadian jurisdictions. New diseases will require longer study before a determination can be made on the probability of work-relatedness.

**Phase Three** will initiate a continual update of the Schedule. Both Phases Two and Three will involve IDSP development of accompanying guidelines and background materials for stakeholder and adjudicator reference.

### THE PANEL'S FINDINGS

#### I. The Current Schedule

The IDSP confirms the WCB's finding that there is a probable connection between work and the diseases currently listed in Schedule 3, shown in Appendix 1.

#### II. Interjurisdictional Use of Schedules

Appendix 3 is a comparison (to 1992) of occupational disease compensation in jurisdictions using schedules or the equivalent. Use of schedules is almost universal for the compensation of occupational diseases. Canadian jurisdictions also accept claims for unlisted occupational diseases. Jurisdictions that accept claims only for listed diseases sometimes retain inclusive definitions for certain diseases.<sup>12</sup>

#### III. Form and Contents of Schedule 3

Appendix 2 contains the Panel's revision of the existing form and contents of Schedule 3 and proposes changes as they would appear in a WCB approved amendment of the Regulations to the Act.

The revised Schedule retains the two column format with changes to enhance the schedule's notice function. Entries are therefore grouped by natural affinity and appropriately titled. For example, "Respiratory Diseases", identifies the obvious.

For the time being, the Panel has decided to keep the current natural

grouping, Poisoning and its Sequelae. Any disease induced by a poisoning can be presumed compensable if there is work exposure to the specified agent. Agent specific diseases could also be added to the Schedule under relevant headings in Phase Two.

The other schedule entries have been edited to clarify disease and process descriptions. For example, the WCB adjudicates claims for welder's flash (damage to the cornea) under the existing entry for Retinitis (damage to the retina). Given the true but different natures of these two conditions, however, claims for one cannot be taken as claims for the other. The proposed entry for these conditions preserves existing protection by synchronizing the law with practice. Editorial changes also make the language more relevant to practice (*e.g.*, the proposed column entries for radiation diseases). Missing column entries were added for clarification, and processes included in the description of disease were shifted to the second column. In any case, none of these revisions has made substantive changes to the law.

Changes from the original are noted in italics.

Because Phase One involves only a revision of the form and content of the existing Schedule without additions or deletions, the Panel concludes that the WCB should proceed with the development of adjudicative Guides for the revised entries. The IDSP agenda and limited financial resources do not permit the Panel to undertake the development of such Guides at this time.

### SUMMARY

The IDSP has determined that Schedule 3 should be updated and kept current on an ongoing basis. Because revision of the Schedule needs to be supplemented by the development of resource materials for interested parties, the project for revising the Schedule should proceed in phases. Phase One closes with the revision of the existing form and contents of Schedule 3 as set out in Appendix 2.

Phase Two will be the addition or deletion of entries in Schedule 3. Additions to the Schedule must have a demonstrably probable connection to an industry, trade, occupation or work process. Deletions can be made if a condition is not a disease but is compensable as an accident. In either case, the requirements or effect of the Act are met and maintained.

### THE PANEL'S RECOMMENDATIONS

1. *That the WCB approve the revised form and contents of the Schedule as set out in Appendix 2.*
2. *That the WCB prepare the Guides (e.g., background materials, fact sheets and rebuttal matrices) for adjudicating claims under the current Schedule 3 as revised.*

(Règles de gestion des causes civiles d'Essex)

Remarque : Le Règlement 189 n'a pas été modifié en 1994. Pour les modifications antérieures, voir la Table des règlements qui figure dans les Lois de l'Ontario de 1993.

**1. (1) La règle 6 du Règlement 189 des Règlements refondus de l'Ontario de 1990 est modifiée par adjonction des dispositions suivantes :**

Made: November 30, 1994

Amending Reg. 674 of R.R.O. 1990  
(Replacement of Life Insurance Contracts)

Note: There are no prior amendments to Regulation 674.

**1.** Clause 2 (2) (b) of Regulation 674 of the Revised Regulations of Ontario, 1990 is amended by adding at the end "without the information recorded under the column entitled "Proposed Replacement Policy" ".

**2.** Form 1 of the Regulation is revoked and the following substituted:

## Form 1

**LIFE INSURANCE DISCLOSURE FORM**

If you are replacing a current insurance policy, you should be given this form *before* you fill out an application for the new insurance. The form outlines some of the details of your current policy and the proposed policy.

The new insurance company must give you a copy of your policy once it has been approved. You have 20 days from the time you receive a copy of this disclosure form to withdraw the new application and receive a full refund of any premiums paid.

**Ask yourself the following questions as you look over this form.**

- ▶ **Is the new policy enough of an improvement to justify any new costs?** All new policies have some new costs, such as those for underwriting, administration and agent's commission.
- ▶ **Do premiums under the new policy rise as you age?** The premiums on some policies go up as you get older or if you get sick.
- ▶ **Are there circumstances where your new policy does not pay benefits?** Part A of this form tells you if your policy will not pay because of suicide or because you provided incomplete information.
- ▶ **Does the new policy pay you as much as the current one?** Make sure you look over the details of death benefits, cash value, and dividends carefully.
- ▶ **Does the new policy guarantee to insure you, or allow you to increase your insurance coverage, no matter what your future medical condition?** Your current policy may do this.
- ▶ **Does your new policy let you borrow money at attractive interest rates?** Your current policy may do this.
- ▶ **Are you losing tax advantages or creating a tax liability?** Many current insurance policies provide valuable income tax benefits. These benefits are not available with some new policies. Cancellation of your current policy may increase your income tax this year. Make sure that you fully understand the tax consequences of changing policies.

**IMPORTANT**

1. DO NOT SIGN THIS FORM UNLESS IT HAS BEEN COMPLETELY FILLED OUT.
2. DO NOT CANCEL YOUR OLD INSURANCE POLICY UNTIL THE NEW ONE IS IN FORCE AND DELIVERED. SIGNING THIS FORM DOES NOT CANCEL YOUR OLD POLICY.
3. NOTE THAT YOU HAVE TO SIGN THE FORM HERE AND ON THE THIRD PAGE.

Name of the person who owns the policy (if not owned by the person who is insured)		
Type of policy (whole life, term, universal, etc.)		
Will you have to pay extra premiums or will your coverage be reduced if you smoke, have health problems, or work at a risky occupation?		
Is the policy registered as an RRSP?		
Most policies will not pay if the person insured commits suicide within two years of the policy's issue date. When does the suicide period on this policy expire?		
A policy may not pay if information on the application was incomplete (for example, if the insured person did not disclose a previous illness to the insurance company). If this information is not discovered within a certain period (usually two years), however, the policy will pay, in the absence of fraud. On what date does this period expire?		
Does the policy give the right to buy additional insurance, whatever the insured person's health? If yes, when and how much?		
Does the policy have any other benefits, e.g., waiver of premium?		
<b>PART B — Premiums</b>		
A premium is the amount of money you pay the insurance company to be insured. Some policies guarantee that the premium amount will stay the same for the length of the policy. Will this policy's premium stay the same?		
What is the annual premium? If Universal Life, what premium is being paid currently? Is there a minimum premium? Is there a maximum premium?

What does the policy pay if the insured person dies today?		
Will this amount change or expire at any time?		
If so, how?		
If Universal Life, is the charge for the death benefit guaranteed?		
<b>PART D — Cash Value, Dividends and Loans</b>		
Some policies have a cash value, which means that some of the insurance premium goes into a reserve that grows in value. The owner of the policy has the option of taking out this cash value, which may end the policy or reduce the death benefit. Does this policy have a cash value?		
If yes, what is the total cash value at the last anniversary?		
What will the guaranteed cash value be at: age 65? age 70? age 75?		
Can loans be taken out on this policy? If yes, at what interest rate may money be borrowed, and on what terms (for example, a set maximum or a variable rate)?		
Is there a loan currently outstanding on the policy?		
Some policies pay dividends based on the performance of the insurance company. Is this policy eligible for dividends?		
If so, what dividend option was selected? (For example, increased insurance coverage, reduced premiums, cash payouts, accumulation)		
How much was the most recent dividend?		
If Universal Life, is there a minimum investment guarantee?		

**NOTE:** Because there are many costs associated with issuing a new policy, it may be in your financial interests to amend the current policy rather than replacing it. In considering your replacement decision, you may wish to seek the advice of the company that issued your current policy.

**EXEMPTION—THE METROPOLITAN TORONTO AND  
REGION CONSERVATION AUTHORITY—MTRC—A-2**

Having received a request from the Metropolitan Toronto and Region Conservation Authority (Authority) that an undertaking, namely:

the activity of creating public open space and public facilities including a stormwater management system and the waterfront drive right of way utilizing lakefill as required and shoreline stabilization with significant emphasis on environmental enhancement, in the

area of the City of Etobicoke (Etobicoke) known as the "Motel Strip",

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Authority that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The people of the City of Etobicoke and the rest of Metropolitan Toronto will be interfered with and damaged by the undue delay and expense required to prepare an environmental assessment for an activity which will provide the implementation mechanism to secure public open space and access in advance of private development, and for which an exemption order has been issued and filed as Ontario Regulation 623/91.
- B. The people of the City of Etobicoke and the rest of Metropolitan Toronto will be interfered with and damaged by the undue delay in providing public open space which will improve the environmental conditions of the Motel Strip and Humber Bay East. In addition, this delay will affect the property acquisition for the public amenity area which is required before redevelopment of the Motel Strip can proceed in accordance with Official Plan Amendment C-65-86 (Motel Strip Secondary Plan) as approved.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The undertaking has been proceeding in keeping with the Official Plan Amendment C-65-86 (Motel Strip Secondary Plan) as approved, with amendments, by the Lieutenant Governor in Council on December 16, 1992.
- B. The limit of lakefill has been established to the satisfaction of the provincial agencies with detailed plans and activities subject to further review and approval by the Federal and Provincial ministries.
- C. The proposed undertaking provides for a public amenity area, including the creation of additional aquatic habitat and treatment facilities for storm water.
- D. The undertaking by the Authority provides the implementation mechanism to satisfy the Official Plan Amendment C-65-86 (Motel Strip Secondary Plan) as approved.
- E. The purpose of this order is to replace Ontario Regulation 623/91 to provide for extended periods to submit a land use plan and commence construction.

This exemption is subject to the following terms and conditions:

1. Where any activity which is the subject of this order is being carried out as or is part of another undertaking which is the subject of an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with the terms or conditions in that exemption order as well as the conditions in this order.

2. The undertaking will comply with the detailed engineering plan as prepared by the Authority and will be a minimum of 76 metres in width including the Waterfront Drive right of way (26 metres).
3. The Authority must submit for approval to the Director of Central Region, Ministry of Environment and Energy, a detailed plan on lakefill prior to construction to include:
  - plans for landform which must fulfil federal requirements pertaining to fisheries, reflect the Authority fill line, and satisfy the storm water management requirements of the Ministry of Environment and Energy;
  - fill quality;
  - methods for control of fill quality;
  - construction methodology to minimize displacement of contaminated sediments and impact on water quality;
  - monitoring during construction and to establish baseline conditions following construction.
4. All lakefilling must be completed prior to the development of the uses in the public strip other than storm water management and the lakeshore drive for which the plan is required.
5. The Authority must prepare and submit to the Minister of Environment and Energy for approval, by December 31, 1995, or such later date as the Minister of Environment and Energy may specify by notice in writing to the proponent and published in *The Ontario Gazette*, a land use plan for the activities to be sited on the area of the undertaking, excluding the stormwater management system and the lakeshore drive right of way. This plan shall include a built-in mechanism for its alteration.

The land use plan will be prepared with public consultation involving local citizens and groups as a Park Master Plan which, if it is approved by the Minister of Environment and Energy, will be submitted for incorporation into the Official Plan Amendment C-65-86 (Motel Strip Secondary Plan).

The creation of activities shall be limited to filling, passive recreation, implementation of the storm water management system and construction of Waterfront Drive until such time as the Minister of Environment and Energy has approved the land use plan referred to in this condition.

6. The public amenity area shall not be sold to anyone other than The Corporation of the City of Etobicoke or The Municipality of Metropolitan Toronto. Should such a sale take place, the use shall be for the use approved in the land use plan referred to in Condition No. 5 and is subject to these conditions.
7. This order shall expire if construction to implement the amenity area has not commenced by December 31, 1996, or such later date as the Minister of Environment and Energy may specify by notice in writing to the proponent and published in *The Ontario Gazette*.
8. This exemption replaces the exemption contained in Ontario Regulation 623/91, which expires on December 16, 1994.

- b) le deuxième centre d'évaluation désigné qui est situé le plus proche de la résidence de la personne assurée procède à l'évaluation, si les parties ne s'entendent pas comme le prévoit l'alinéa a).

(8) Si un centre d'évaluation désigné doit procéder à l'évaluation :

Si la décision définitive est que le versement des indemnités n'aurait pas dû être interrompu, l'assureur :

- a) d'une part, reprend le versement des indemnités;
- b) d'autre part, verse les indemnités non versées.

(14) Si la personne assurée ne se soumet pas à l'évaluation qu'elle demande aux termes du paragraphe (3) ou qu'elle ne se conforme pas aux exigences du paragraphe (9), l'assureur peut retenir le versement des indemnités hebdomadaires jusqu'à ce que la personne assurée se soumette à l'évaluation ou se conforme au paragraphe (9), selon le cas, après quoi l'assureur :

- a) d'une part, reprend le versement des indemnités;
- b) d'autre part, verse les indemnités non versées si le rapport de l'évaluation indique que les indemnités devraient continuer d'être versées.

**DEBT AND FINANCIAL OBLIGATION LIMITS**

**1. (1)** The annual debt and financial obligation limit for municipalities shall be determined under this Regulation.

(3) The Ministry shall inform the treasurer of the municipality in writing of the limit.

**2.** A municipality shall use the most recent limit provided to it by the Ministry to determine whether Ontario Municipal Board approval is required in respect of the following categories of debt or financial obligation:

- 1. Long-term debt assumed by a municipality for which repayment will be required beyond the term for which the council was elected.
- 2. Other financial commitments, liabilities and contractual obligations, for which payment may or will be required beyond the term for which the council was elected, including financial commitments to hospitals and universities.

- iv. under agreement with the Government of Ontario, for the purpose of repaying the principal and interest of long-term debt or meeting financial obligations of the municipality,

2. Multiply the amount obtained in paragraph 1 by 25 per cent.
  3. Subtract from the amount obtained in paragraph 2 the total payments in the fiscal year related to the long-term debt of the municipality less,
    - i. the payments in that year for long-term debt or financial obligations for which the Government of Ontario has agreed to provide to the municipality the amounts required by the municipality to repay the principal and interest of the debt or to meet the financial obligations,
    - ii. payments in that year from another municipality or a school board for the repayment of the principal and interest of long-term debt of the municipality borrowed for the exclusive purposes of the other municipality or school board,
    - iii. the payments for electrical, telephone and gas service provided by the municipality for which revenues are received by the municipality in that year,
    - iv. the payments for shoreline assistance and tile drainage in that year, and

  4. (1) Before authorizing any specific work or any increase in expenditure for a previously authorized specific work that would require a long-term debt or financial obligation described in section 2, the council of the municipality shall have its treasurer calculate an updated limit using the most recent debt and financial obligation limit determined by the Ministry.
    - (2) The treasurer shall update the most recent limit determined by the Ministry as follows:
      1. Adjust the limit in respect of the estimated annual amount payable for any long-term debt or financial obligation described in section 2 assumed or discharged by the municipality since the last day of the past fiscal year for which the limit was calculated.
      2. Subtract from the amount obtained in paragraph 1, the estimated annual amount payable in respect of any project approved by the Ontario Municipal Board or the council, as the case may be, to be financed by long-term debt or financial obligation described in section 2 but not as yet assumed unless council has, by resolution, indicated that it will not proceed with that project.
      3. Subtract from the amount obtained in paragraph 1 any amount recognized by the treasurer as annually payable or as payable in the year in respect of a financial obligation described in paragraph 2 of section 2.
        - (3) The treasurer shall calculate the estimated annual amount payable by the municipality in respect of the work.
        - (4) The treasurer shall not include in the update under subsection (2) or the calculation under subsection (3) any amounts payable by the municipality for the following categories of long-term debt or financial obligation:
          1. Debt or financial obligation for which the Government of Ontario has agreed to pay to the municipality the amounts required by the municipality to repay the principal and interest of the debt or to meet the financial obligation.
          2. Debt under the *Tile Drainage Act* or the *Shoreline Property Assistance Act*.
          3. Debt or financial obligation in respect of electrical, telephone and gas service provided by the municipality for which revenues are received by the municipality.
          4. Debt with respect to the downtown revitalization loan program.
        - (5) The treasurer is not required to include in the update under subsection (2) or the calculation under subsection (3) any amounts recognized by the treasurer as current expenditures under lease agreements.
        - (6) The council of a regional, metropolitan or district municipality or the County of Oxford which borrows money or issues debentures for the exclusive purpose of one of its area municipalities is not required to have its treasurer update its debt and financial obligation limit in respect of the borrowing or issuance.
        - (7) The council of a county which borrows money or issues debentures for the exclusive purpose of a town, not being a separated town, a village or a township is not required to have its treasurer update its debt and financial obligation limit in respect of the borrowing or issuance.
        - (8) The council of a municipality authorizing the issue or sale of debentures for a school board under section 123 of the *Municipal Act* is not required to have its treasurer update its debt and financial obligation limit in respect of the authorization.
        - (9) The council of a municipality authorizing the issue of debentures under section 124 of the *Municipal Act* is not required to have its treasurer update its debt and financial obligation limit for those debentures to the extent they are issued in respect of money raised for another municipality.
        - (10) If a council does not require the treasurer to calculate an updated limit under subsection (6), (7), (8) or (9), the treasurer shall not include any amount in respect of the borrowing, issuance or authorization in an update under subsection (2) or a calculation under subsection (3).
        - (11) If the amount calculated under subsection (3) exceeds the amount updated under subsection (2), the council must obtain the approval of the Ontario Municipal Board before authorizing the work.
    5. (1) The Ministry shall calculate a transitional debt and financial obligation limit for a municipality in respect of any fiscal year in which the following conditions are met:

1. The municipality has been erected, incorporated or created by statute or has had a boundary alteration within the past five years.
2. The financial information necessary for the Ministry to determine a debt and financial obligation for the municipality under section 3 is not available.

(2) Despite sections 1 and 3, the Ministry may determine a transitional debt limit by estimating the revenue fund revenues for the year and by using relevant financial information obtained from any municipality or from any fiscal year.

(3) Despite section 4, the treasurer may update a transitional debt limit using relevant financial information from any fiscal year.
